PROFESSIONAL SUMMARY

Java Developer with hands-on industry experience (2024–Present) building RESTful APIs and microservices using Java and Spring Boot. Strong foundation in API-led connectivity, JWT authentication, and asynchronous messaging (JMS), gained through enterprise integration projects on SAP BTP Integration Suite and MuleSoft. Experienced in Node.js backend development, containerization with Docker, CI/CD pipelines, and Agentic AI development with LLMs and LangGraph, applying consistent object-oriented and REST API design principles across Java, JavaScript, and Python stacks.

SKILLS

- **Core Java & Backend:** Java, Spring Boot, Spring (MVC/REST Controllers), Microservices Architecture, JWT Authentication, RESTful API Design, Object-Oriented Design
- **Languages:** Java, JavaScript, TypeScript, Python, SQL, Groovy, HTML/CSS
- **Frameworks & Runtime:** Spring Boot, Node.js, Express.js, React.js, Next.js, LangChain, LangGraph
- **Agentic AI & LLMs:** LLM Application Development, LangGraph, LangChain, Agentic AI Workflows, Prompt Engineering, Python
- **Integration & Messaging:** SAP BTP Integration Suite, MuleSoft, JMS, OData, AEM Adapter, API-led Connectivity
- **DevOps & Tools:** Docker, CI/CD Pipelines, Git, GitHub, Postman, Apache
- **Databases:** MongoDB, PostgreSQL
- **AI-Assisted Development:** Prompt Engineering, GitHub Copilot, Cursor, v0.dev

PROFESSIONAL EXPERIENCE

Capgemini

2024 – Present

Java Developer / Software Developer — Pune, India

- Completed an 18-month intensive training program in Core Java, Spring Boot, and microservices architecture, covering RESTful API design, JWT-based authentication, DataWeave, and API-led connectivity.
- Designed and developed RESTful APIs and microservices using Java and Spring Boot, applying object-oriented design principles for scalable, maintainable backend systems.
- Built production-ready Node.js microservices for enterprise clients, applying the same REST API and microservices design patterns used in Java/Spring Boot development.
- Developed integration flows on SAP BTP Integration Suite, including JMS messaging, Groovy-based scripting, and exception handling for enterprise backend systems.
- Selected for live client project assignment ahead of peers based on technical performance and skill development during training.

PROJECTS

Johnson & Johnson — SAP BTP Integration Project

SAP BTP Integration Suite, JMS, Groovy, OData

- Developed backend integration flows (SAP iFlows) that consume messages from Solace queues via the AEM adapter, implementing exception handling and retry mechanisms.
- Implemented dead-letter-queue (DLQ) logic using Groovy scripting and value mapping to classify and route technical and functional errors.
- Configured JMS messaging between integration flows to enable reliable, asynchronous backend data processing.
- Integrated OData APIs via HTTP adapter with dynamic query parameters and XML-to-JSON conversion for downstream service consumption.

Kimberly-Clark Corporation — API Integration Migration Project

Node.js, Docker, Express, REST APIs, CI/CD

- Led migration of enterprise API integrations from MuleSoft to a Node.js/Express backend, replicating existing integration flows as RESTful microservices.
- Containerized backend services using Docker for consistent deployment across environments and implemented a CI/CD pipeline to automate build, test, and deployment.
- Delivered production-ready microservices with zero data loss and minimal downtime during cutover, applying backend architecture principles transferable to Java-based systems.

CERTIFICATIONS & ACHIEVEMENTS

- EF SET English Certificate — C2 Advanced (76/100)
- Smart India Hackathon (April 2022): Selected for the National Round.
- Coding Ninjas Top Performer (Feb 2023): Awarded Excellence Certificate for outstanding performance.

EDUCATION

Lovely Professional University

Sept 2020 – June 2024

Bachelor of Technology in Computer Science, Phagwara, Punjab

Languages: English — Professional Proficiency (C2 Advanced) | Hindi — Native
